Questions

No.	Questions	Reasons
1	In each cosmetic and dietary supplement category, which country's products have the highest sales prices and ratings, and how does this indicate supply trends? And vice versa?	Identifying countries with <u>high-priced products</u> and <u>best reviews</u> helps understand <u>supply trends</u> and <u>international source quality</u> .
2	Product categories with general functions are produced on many continents? Which famous brands are associated with the leading countries in the continent?	Analyzing <u>famous brands</u> from leading countries helps understand <u>cross-functional product distribution</u> and <u>brand influence</u> by continent.
3	In each cosmetic and dietary supplement category, which countries have the highest market share, and how does this indicate supply trends?	Countries with high market shares <u>reflect each country's competitiveness</u> and <u>product supply trends</u> .
4	Which format is more popular and easier to use according to category?	Popular formats help analyze <u>preference</u> and <u>convenience</u> across <u>product categories</u> .
5	Price distribution of products of famous brands	Price distribution analysis helps understand <u>market stratification</u> and <u>pricing strategies</u> of <u>famous brands</u> .

IDEAS TO SOLVES THESE PROBLEMS

Issue: **Missing data**

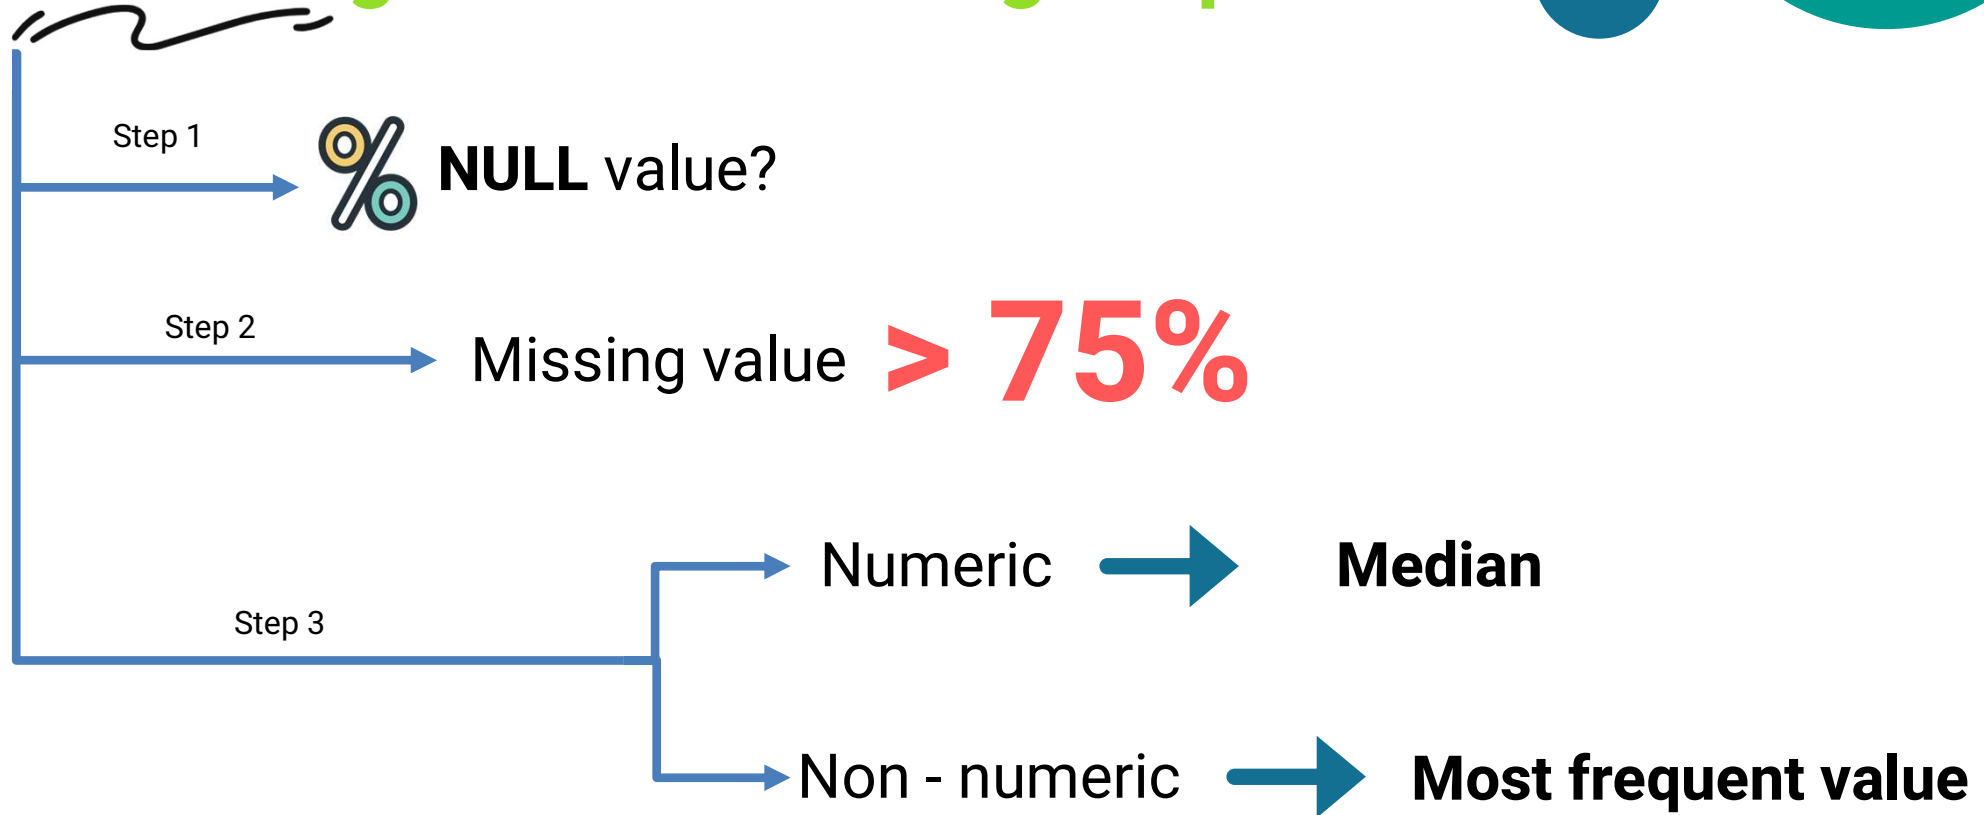

Revisiting Data Processing Steps

Improve data cleaning process to make them more efficient and attempt to fill missing values using estimation methods if possible.

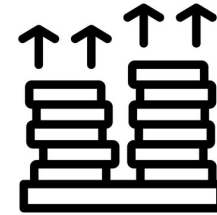

Revisiting Data Processing Steps

IDEAS TO SOLVES THESE PROBLEMS

Handle with
Limited data scope

EXPAND DATA SOURCE

Collect additional data from other websites to get additional required properties.

INCREASING THE NUMBER OF ATTRIBUTES

To increase the number of possible questions from the available data and decrease the difficulties when making questions, we decided to create additional attributes. The new attribute columns will be derived from existing columns.
